Professional Summary

Computer Science graduate specializing in Cyber Security with 9.06 CGPA and hands-on knowledge of Java, HTML, CSS, React, and networking concepts. Strong foundation in Java OOP, Collections Framework, exception handling, and file handling. Developed academic projects involving secure network implementation and responsive web applications. Currently enhancing Java development skills through practical training and personal projects, seeking an entry-level Java Developer or Full Stack Java Developer opportunity.

Technical Skills

Languages: Java, MySQL

Frontend Technologies: React Basics, HTML, CSS, JavaScript Basics

Core Java: OOP Concepts, Collections Framework, Exception Handling, File Handling

Networking & Security: Cisco Packet Tracer, RADIUS, AAA, VLAN, Inter-VLAN Routing, SSH, Wireshark

Tools & Platforms: Eclipse IDE, Visual Studio Code, MS Word

Soft Skills: Problem-Solving, Communication, Team Collaboration

Experience

Advanced Java Programming Internship — Tap Academy

Ongoing

- Developing practical Java programming skills through structured internship training and hands-on exercises.

Networking Internship — Innovative Institute of Technology

- Gained practical exposure to networking concepts and network configuration using relevant tools and technologies.

Projects

AAA Implementation with Device Hardening

Cisco Packet Tracer, RADIUS Server

- Implemented Authentication, Authorization, and Accounting (AAA) using a centralized RADIUS server.
- Secured network devices by configuring SSH, strong password policies, disabling unused ports, and mitigating brute-force attacks.
- Applied VLAN segmentation to strengthen network access control and administrative security.

Campus and Bank Network Design

Cisco Packet Tracer

- Designed scalable campus and bank network topologies using VLANs and inter-VLAN routing.
- Configured routers and switches to enable secure communication across multiple departments.
- Applied networking best practices to support network reliability and security.

Responsive Login & Signup Application

React, HTML, CSS, JavaScript

- Developed responsive Login and Sign-Up interfaces using reusable React components.
- Implemented client-side form validation to improve usability and input handling.
- Built a mobile-friendly interface following modern UI principles.

Education

Dhanalakshmi Srinivasan University, Trichy

Sep 2022 – May 2026

Department of CSE (Cyber Security) — CGPA: 9.06

Sri Chaitanya Junior College, Nellore

Jul 2020 – Apr 2022

Intermediate (MPC) — 95.2%

Veda Vyasa English Medium High School, Nellore

Jun 2019 – Mar 2020

Percentage: 89.5%

Certifications

- Advanced Java Programming Internship — Anudip Foundation (Ongoing)
- Networking Internship — Innovative Institute of Technology
- NPTEL — Ethical Hacking (6 Weeks)
- Cybersecurity Workshop — Thetechuniqu Academy
